October 4th 2018

SUBJECT: Product Change Notice - Phoenix Scanner

Dear valued distributor,

Some of you may be aware of the on-going Phoenix scanner redesign. This is now complete and Fireeye will be supplying the new design model as soon as the existing Phoenix scanners production of 110 units is completed and sold.

This is a minor redesign to provide a “family look” to our smart scanners. For the Phoenix scanner, we are changing the housing material to Aluminum. This housing is the same one that is used for the new InSight series IV scanner. The housing is more durable than the previous, GE Valox material construction and by using the Aluminum housing Fireeye can be more flexible and efficient in our manufacturing operations.

Everything else stays the same; the connector, the user interface, performance, etc. Essentially, the phoenix “guts” is placed in a different housing.

Since the beginning of 2018 the new model numbers were already listed in the Asia and EMEA price books. The reference bulletin is CU-119 which is available for download from the Fireeye website.

Phoenix UV versions	Phoenix IR versions
85UVF1A-1QD 85UVF1A-1QDK3 85UVF4A-1QDK3WR 85UVF4A-1QDWR 85IRF1A-1QD 85IRF4A-1QDWR	85IRF1A-1QD 85IRF4A-1QDWR
